This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFATORY.

THE present period in the history of our country, may, most emphatically, be called the Era of Rail Roads. Within the past twenty-five years, more than three thousand three hundred miles of these "iron arteries of commerce" have been projected, finished and put in operation, within the limits of the New England States alone; and the iron horse now thunders along our valleys, and climbs our mountain passes, scattering in its way the seeds of intelligence, enterprise and commercial prosperity, carrying to almost every door the means of regular, constant and speedy intercourse and communication with every portion of the land, dotting the streams and valleys as it passes with new centers of business and labor, and calling into existence manufactories and villages, post-offices, stations and business places almost without number.

It is to supply a want, created by the rapid increase of this multitude of small manufacturing villages, rail road stations and business places, which have been called into existence and importance, as the fruit of our Rail Road enterprise, that the present work has been undertaken. Rail Road and Express men, and business forwarders generally have long felt the necessity of some more comprehensive catalogue of the business places in our country, and a more definite and particular guide to their Township localities and Rail Road connections than is afforded by the Rail Road and Post Office Guides, and Maps and Gazetteers heretofore published.

In submitting the Express Directory and Railway Forwarder's Guide to the public, the compiler flatters himself that for comprehensiveness, conciseness and definiteness, it has never been equaled by any work offered to their inspection or use. Nearly four years have elapsed since its compilation was commenced, and from eighty pages, the limits first proposed, its size has been increased to nearly three hundred. More than two hundred names of business places have been collected and located in their townships and Rail Road connections, which are not to be found on any Map or in any Guide or Gazeteer, heretofore published.

In a work of this character, and more especially in that portion of it giving the Rail Road connection for places or towns off the line of

any rail road, it would not be unreasonable to suppose that some mistakes would unavoidably occur, but the author flatters himself that as few errors of this description will be found in this work, as in anything of the kind heretofore published. In committing the result of his labors to the public, he is encouraged by the consideration that those whose criticism is most to be feared, will best understand the difficulties attending its compilation, and most fully appreciate the value of the information it affords.

EXPLANATION

OF THE

PLAN OF THE DIRECTORY.

THE first column of the Directory gives the *name* of each City, Town or Township, Post Office, Rail Road Station, Village or business place; and, when not an incorporate City or Township, the name, in italics, directly under it, of the *Township* in which it is located; the second column, the County in which each place is situated; the third column, the nearest Rail Road, and the fourth column the nearest or most accessible Rail Road Station. The fifth column is left blank for the accommodation of Rail Road and Express Agents, to be filled up for the government of their own particular Station, with directions for way-billing or forwarding, and also for the use of mercantile or manufacturing houses, to be filled up with the names of Rail Roads or Expresses in their own localities through whom they may communicate with or forward to each place. The *names* of business places, are arranged alphabetically by States; where there are two or more places of the same name, in the same State, the *Township* is named first, and the following names are entered alphabetically by the Townships in which they are located.

In locating the Station for Rail Road communication, with places off the line of any Rail Road, where two or more Rail Roads or Stations were equally distant, two general rules have been followed, in selecting the most accessible Station; first, to note the Station affording the most frequent *mail* communication, and second, that Station on the line of Rail Road, giving the most accessible and direct communication with the great Markets of New York and Boston.

An Alphabetical list of Rail Roads and the principal Express Companies transported by each Road, is appended to the Guide, and also a Detailed Statement of the various Rail Roads, showing their length, the place and Rail Road from which each Road starts, the Branches, Connections and Junctions on its route, the place where it terminates, and the line of Road connecting and continuing the various routes from its termination.

COMMENDATORY NOTICES.

CONNECTICUT RIVER RAILROAD OFFICE,
SPRINGFIELD, MASS., MAY 10th, 1858.

GEORGE P. GEER, ESQ.,

DEAR SIR:—I herewith return the specimen copy of your "EXPRESS DIRECTORY AND RAILWAY FORWARDER'S GUIDE," which I have examined with much interest and satisfaction. So far as my knowledge of localities extends, I find the book to be perfectly reliable for information, as to the best means of communicating with every town and village in New England. It supplies a want which has long been felt by the Railway interest, and I congratulate you upon the success which must attend its introduction.

No one can realise, till he has had the responsibility of forwarding merchandise, how great is the perplexity arising from the repetition of the same name for townships in adjoining States, or the use of one name to designate, as often happens, several different parishes or villages in the same State. All this, you have as far as possible obviated, by classifying the States, and arranging all the names of each alphabetically and stating the Township and County in which every village is situated, as well as the nearest Railroad station. This can only have been accomplished at a vast expenditure of patience, labor, time and money, for all which I hope you will be repaid in a business way.

Our Road will require some twelve or fifteen copies of the work, and I predict that no Railway manager, after becoming acquainted with the merits of the book, will feel that he can afford to be without a copy for each merchandise station on his line.

Yours Truly, D. L. HARRIS, PRESIDENT.

OFFICE WESTERN RAILROAD CORPORATION,
SPRINGFIELD, MAY 12th, 1858.

GEORGE P. GEER, ESQ.,

DEAR SIR:—I have examined a copy of "GEER'S EXPRESS DIRECTORY AND RAILWAY FORWARDER'S GUIDE," and can recommend it to Railroad Companies and Forwarders of Merchandise, for correct information as to marking of goods and forwarding the same correctly.

Yours Respectfully, H. GRAY, SUPERINTENDENT.
